### Wiring diagram

### Functional principle

Ultrasonic sensors capture a multitude of objects contactlessly and wear-free with ultrasonic waves. It does not matter whether the object is transparent or opaque, metallic

or non-metallic, firm, liquid or powdery. Even environmental conditions such as spray, dust or rain hardly affect their function.

The sonic cone diagram indicates the detection range of the sensor. In accordance with standard EN 60947-5-2, quadratic targets in a range of sizes (20 × 20 mm, 100 × 100 mm) and a round rod with a diameter of 27 mm are used.

Important: The detection ranges for other targets may differ from those for standard targets due to the different reflection properties and geometries.

## Mounting instructions

### Mounting instructions/Description

#### Setting the switchpoint

The ultrasonic sensor features a switching output with a teachable switching point. The green and yellow LEDs indicate whether the sensor has detected the object.

A switching point or a switching window is taught in. This must be within the detection range. In this operating mode the background is suppressed.

#### Teach

- Position the object at the beginning of the protection area
- Short-circuit pin 2 (WH) against Ub for 2–7 seconds to teach in an individual switching point or the beginning of the switching window
- Place object at the end of the switching range
- Short-circuit pin 2 (WH) against Ub for 8–11 seconds to teach in the end of the switching window

After a successful teach-in, the yellow LED flashes at 2 Hz and the sensor runs automatically in normal mode.

Optional: Short-circuit pin 2 (WH) against Ub for 12–17 seconds to switch between NC and NO function (no object required)

- Return to normal operating mode after 17 s or more.

#### LED response

In standard operating mode, the two LEDs indicate the switching state of the sensor.

- Green: Object within the detection range but not in switching range
- Yellow: Object is within the switching range
- Off: Object is outside the detection range or signal loss
