

NIMFE-EMT12/6.2L101-UP6X-H1141

Magnetic Field Sensor

For Detection of Ferromagnetic Parts

Technical data

| | |
|--|---|
| Type | NIMFE-EMT12/6.2L101-UP6X-H1141 |
| ID | 1600613 |
| General data | |
| Electrical data | |
| Operating voltage U_B | 10...30 VDC |
| Ripple U_{ss} | $\leq 10 \% U_{Bmax}$ |
| DC rated operating current I_o | $\leq 100 \text{ mA}$ |
| No-load current | $\leq 15 \text{ mA}$ |
| Residual current | $\leq 0.1 \text{ mA}$ |
| Isolation test voltage | 0.5 kV |
| Short-circuit protection | yes/Cyclic |
| Voltage drop at I_o | $\leq 1 \text{ V}$ |
| Wire break/reverse polarity protection | yes/Complete |
| Output function | 3-wire, Connection programmable, PNP |
| Mechanical data | |
| Design | Threaded barrel, EMT12/4,6L88 |
| Dimensions | 101 mm |
| Housing material | Stainless steel, 1.4301 (AISI 304), PTFE-coated |
| Active area material | Stainless steel, 1.4301 (AISI 304), PTFE-coated |
| Max. tightening torque of housing nut | 10 Nm |
| Electrical connection | Connector, M12 x 1 |

Features

- Threaded barrel, M12 x 1
- Stainless steel, 1.4301, PTFE-coated
- DC 3-wire, 10...30 VDC
- NC/NO parametrizable with teach adapter VB2-SP1
- M12 x 1 male connector

Wiring diagram

Functional principle

The weld sensors are available in different versions, with different signal intensities and diameters. Ferromagnetic parts which differ strongly in their material properties and diameters can thus be detected. A target part has to be located within the so called sensitive area in order to be detected. The internal sensor signal reaches the maximum intensity if the sensitive area is completely covered by the target. Partial coverage is also possible.

Sensitive area $S = 11 \text{ mm}$

Within this area the sensor signal changes when components are connected.

Maximum range $M = 14 \text{ mm}$

In case of complete coverage of the sensitive area the maximum signal intensity is achieved.

Technical data

| Environmental conditions | |
|--------------------------|---|
| Ambient temperature | -25...+70 °C |
| Vibration resistance | 55 Hz (1 mm) |
| Shock resistance | 30 g (11 ms) |
| Protection class | IP67 |
| MTTF | 874 years acc. to SN 29500 (Ed. 99) 40 °C |
| Power-on indication | LED, Green |
| Switching state | LED, Yellow |

Mounting instructions

Mounting instructions/Description

The image contains several technical line drawings illustrating different mounting configurations for a magnetic field sensor. The components shown include: 1. A sensor probe with a conical tip and a threaded base. 2. A U-shaped mounting bracket with a central hole. 3. A square mounting plate with a central hole. 4. A hexagonal nut. 5. A threaded bolt. 6. A welding nut (a nut welded to a plate). 7. A spacer or reinforcing sleeve. The drawings show the sensor probe being mounted onto these various components in different orientations and combinations, demonstrating its versatility in detecting different types of ferromagnetic targets.

| | |
|------------------------|-----------------------------|
| Distance D | $3 \times B$ |
| Distance W | $3 \times S_n$ |
| Distance T | $3 \times B$ |
| Distance S | $1.5 \times B$ |
| Distance G | $6 \times S_n$ |
| Diameter active area B | $\varnothing 12 \text{ mm}$ |

The magnetic field sensor is especially suited for the detection of welding nuts as well as spacer or reinforcing sleeves. The parts to be detected must always consist of ferromagnetic material, so that a proper function can be guaranteed. Most applications need center bolts to tack the welding nuts and reinforcing sleeves in place and thus provide mechanical protection of the sensors. These bolts have to be made of non-ferromagnetic material, like stainless steel for example. Center bolts are not available at Turck, as these have to be individually produced for and adjusted to the correspondent application.

The welding nut sensor easily detects ferritic targets with diameters between 10 mm and 20 mm.

Accessories

VB2-SP1

A3501-29

Teach adapter

MW12

6945003

Mounting bracket for threaded barrel sensors; material: Stainless steel A2 1.4301 (AISI 304)

BSS-12

6901321

Mounting clamp for smooth and threaded barrel sensors; material: Polypropylene
