# RU100L-M18MS-UN8X2-H1151 Ultrasonic Sensor – Retroreflective Sensor

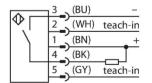

### Technical data

Type	RU100L-M18MS-UN8X2-H1151
ID	1610087
Ultrasonic data	
Function	Retroreflective
Range	1501000 mm
Minimum switching range	10 mm
Ultrasound frequency	200 kHz
Repeat accuracy	≤ 0.15 % of full scale
Temperature drift	± 1.5 % of full scale
Linearity error	≤ ± 0.5 %
Edge lengths of the nominal actuator	100 mm
Approach speed	≤ 8 m/s
Pass speed	≤ 2 m/s
Electrical data	
Operating voltage U <sub>B</sub>	1530 VDC
Residual ripple	10 % U <sub>ss</sub>
DC rated operating current I <sub>e</sub>	≤ 150 mA
No-load current	≤ 50 mA
Load resistance	≤ 1000 Ω
Residual current	≤ 0.1 mA
Response time typical	< 90 ms
Readiness delay	≤ 300 ms
Output function	NO/NC, NPN
·	

### **Features**

- Rectangular transducer front
- Cylindrical housing M18, potted
- Connection via M12 x 1 male
- Temperature compensation
- ■Teach-in range: 15...98 cm
- Resolution: 1 mm
- ■Aperture angle of sonic cone: ±16 °
- ■1 x switching output, NPN
- Configurable via Teach-In
- Parameterizable NO/NC

### Wiring diagram

### Functional principle

Ultrasonic sensors capture a multitude of objects contactlessly and wear-free with ultrasonic waves. It does not matter whether the object is transparent or opaque, metallic or non-metallic, firm, liquid or powdery. Even environmental conditions such as spray, dust or rain hardly affect their function.

The sonic cone diagram indicates the detection range of the sensor. In accordance with standard EN 60947-5-2, quadratic targets in a range of sizes (20 × 20 mm, 100 × 100 mm) and a round rod with a diameter of 27 mm are used.

Important: The detection ranges for other targets may differ from those for standard

## Mounting instructions

### Mounting instructions/Description

Teaching the reflector position
The ultrasonic sensor features a switching
output with a teachable switching range. The
green and yellow LEDs indicate whether the
sensor has detected the object.

A switching range is taught in. This must be within the detection range. In this operating mode, the taught reflector position is detected permanently without an object.

### Easy-Teach

- Connect the teach adapter TX1-Q20L60 between the sensor and connection cable
- Stationary reflector within the detection range
- •Press and hold button for at least 2 s against Gnd

After a successful teach-in, the green LED flashes at 3 Hz and the sensor runs automatically in normal mode.

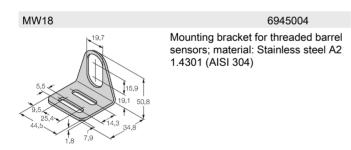

• To invert the output function, press and hold the button against the Ub for 2...7s

### LED response

In standard operating mode, the two LEDs indicate the switching state of the sensor.

- Green: reflector within the detection range
- Yellow: object between the sensor and reflector
