IM-3-CJT

Temperature measurement with thermoelements requires a very precise determination of the reference point temperature. The IM-3-CJT offers this possibility.

A Pt100 with 4-wire circuitry is mounted and encapsulated in two 3-pin standards clamps. The Pt100 measures the temperature at the contact point. The thermocouples is connected to the IM-3-CJT at the two open clamps.

The IM-3-CJT is plugged to the correspondent IM34* in place of the 3-pin screw terminals.

- High measuring accuracy through Pt100 in 4-wire circuitry
- Rugged encapsulation
- Simply plugged into place

Type	IM-3-CJT
ID	6900524
Weight	18 g
